tips

4.

Denny Tse
founder of Bugs Design Consultants

- Physically, I like exposing the original structure to maximise the space - do not hide the beam with a small ceiling or build a platform to separate different areas
- Visually, you should unite the floor finish between rooms if the space is small. Don't use wooden floors in the living area and carpet your floors in the bedroom, for example - it cuts the eye short at every delineation and makes the space feel smaller
- For a cool focus in small homes, I like to incorporate a feature wall with special paint, wallpaper or artwork. I find this really helps stylise a space

- 從實際方面而言，我喜歡呈現居所原有的結構以增加空間感——不要為了隱藏橫樑而打造矮小的天花，也不要打造平台來分隔空間
- 從視覺方面而言，如果空間不大，房間之間的地板物料應統一。舉個例子，客廳採用木地板，睡房則鋪上地毯，這會阻隔了視線的延續性，使空間變得更小
- 想在小居所內營造焦點，我會借用特別的油漆、牆紙和藝術品來製造一堵特色牆壁——這個方法真的能營造出時尚的格調
